

Please download and share / use anyway you see fit. NCCAOM requires a MINIMUM of 1365 hours (most programs have more) specifically in acupuncture and needling therapy, not counting herb classes or biomedical classes like anatomy and physiology, biochemistry, etc.... Physicians who complete a AAMA course have at least 300 hours. Chiropractors are only required to have 100 hours to be certified in acupuncture, and physical therapists must have 46 hours over a two year period, but can start treating people after a weekend course. You've worked hard to achieve your gains. Don't trust your health to someone that learned needling in a weekend!"

(Hours above = hours of training)
